

Atul Kumar Jain
Director, Punj Lloyd Group

Atul Kumar Jain is a Director on the Board of Punj Lloyd Limited (the "Company").

A Chemical Engineer from Roorkee University, Atul's journey in Punj Lloyd is a story of empowerment and growth from within. Joining the Group as a young GET in 1982, Atul, a Project Engineer in the Company's oil and gas vertical, steadily rose with his hard work and enthusiasm to today assume a position on the Board.

Atul was instrumental in the growth of the Company in its initial years through his successful execution of projects. From the Group's primary insulation jobs in Algeria and Indonesia, Atul's expertise in Pipelines saw the vertical emerge as an area of core competence for the Company. The first overseas pipeline in Indonesia, Pertamina's Balongan-Jakarta, and the projects thereafter; the Multi Product Pipeline in Malaysia for SHELL / Petronas, Mangalore - Bangalore Pipeline Project, and the transnational pipeline, Baku-Tbilisi-Ceyhan Crude Oil Pipeline in Turkey and Georgia for Botas/BP, stand testimony to Atul's pipeline construction and project management prowess.

He was also involved in developing the oil and gas businesses of refineries, tankage & terminals and power and in the Company's strategy to expand its footprint to other geographies. Of special mention is Atul's tenure as President and CEO of the entire Middle East, Africa and CIS regions of Punj Lloyd where he executed mega orders including the Shah Gas Gathering Station in Abu Dhabi, Strategic Gas Transmission Pipeline, Fuel Systems and Polysilicon Project in Qatar.

Forging new relationships and fostering old, Atul is involved in large wins for the Company - ORPIC and OGC in Oman and RAPID in Malaysia for Petronas.

Atul's positive outlook and leadership qualities have helped establish a competent and passionate team while his negotiation skills have immensely benefitted the Company in inking new contracts.
